Optional syllabus text

Heavy weekly homework, fast-paced lectures, quizzes, and challenging exams.

Optional student review summary

Students usually say it takes a lot of practice outside class.

Formatted Output

The result below is ready to copy and uses the exact layout you asked for.

Total weekly time required: 64 hours

Class ratings:

- Calculus III: 🟡 looks demanding because the course notes point to heavier graded work.
- PHYSICS II: 🟡 looks demanding because the course notes point to heavier graded work.
- PHYSICS II LAB: 🟢 has a steady workload that should stay manageable with regular study time.
- STATICS: 🟢 has a steady workload that should stay manageable with regular study time.
- Materials or Engineering Materials: 🟢 has a steady workload that should stay manageable with regular study time.
- General Studies / Humanities elective: 🟢 has a steady workload with a few larger assignments to plan around.

Overall schedule rating: 🔥🔥 moderate

Pros:

- The schedule can still feel workable if you stay organized from the start.

Cons:

- One or more classes look demanding and may create stressful weeks.
- The weekly time commitment is high and may be hard to maintain consistently.
- Multiple higher-effort classes could make deadlines pile up at the same time.
